HYDRAULIC EXCAVATOR

WALK-AROUND

Productivity Features

- **High Work Equipment Speed**
Arm quick return circuit enables loading work to be quicker than ever, by reducing hydraulic pressure loss of arm dumping.
- **Heavy Lift Mode**
The heavy lift mode increases lifting force by 10%.
- **Large Digging Force**
Pressing the Power Max function button temporarily increases the digging force.
- **Two-mode Setting for Boom**
Switch selection allows either powerful digging or smooth boom operation.
- **Large Drawbar Pull and Steering Force**
provide excellent mobility.
- **Swing Priority Mode**
The swing priority mode improves efficiency for loading dump trucks at 90° or 180°.
- **Shockless Boom Control**
Switch selection reduces chassis vibration after sudden stops.

See page 5.

Reliability and Durability Features

- **KMAX Bucket Teeth** offer superior penetration and long-term sharpness.
- **Fuel Pre-filter** with water separator and **High Efficiency Fuel Filter** equipped as standard.
- **O-ring Face Seals**, which have excellent sealing performance, are used for the hydraulic hoses.
- **High-pressure In-line Filtration**
The cool-running hydraulic system is protected with the most extensive filtration system available, including a high pressure in-line filter for each main pump.

Maintenance Features

- **Easy Cleaning of Cooling Unit**
Fan reverse-rotation function facilitates clogged radiator cleaning.
- **Easy Checking and Maintenance of Engine**
- **Large Handrail, Step and Catwalk** provide easy access to the engine and hydraulic equipment.

See page 11.

Ecology and Economy Features

- **Low Emission Engine**
A powerful, turbocharged and air-to-air aftercooled Komatsu SAA6D140E-5 provides **363 kW 487 HP**. This engine is U.S. EPA Tier 3 and EU Stage 3A emissions certified, without sacrificing power or machine productivity.
- **Economy Mode Four-level Setting**
Enables operator to select the appropriate Economy mode level to match production requirement with lowest fuel consumption.
- **Reduction of Ambient Noise**
 - Electronically controlled variable speed fan drive
 - Large hybrid fan
 - Low-noise muffler
- **Mode Selection**
 - Economy mode improves fuel consumption.
 - ECO gauge for energy-saving operations
 - Extended idling caution for fuel conservation
 - Auto deceleration and auto idling system reduce fuel consumption.

See pages 4, 5.

Photo may include optional equipment.

Working Environment

- **Large Comfortable Cab**
 - Low-noise cab
 - Low vibration with cab damper mounting
 - Highly pressurized cab with optional air conditioner
 - Operator seat and console with armrest that enables operations in the appropriate operational posture.
 - OPG top guard level 2 (ISO 10262) capable with optional bolt-on top guard

See pages 8, 9.

Large Liquid Crystal Display (LCD) Monitor

- Easy-to-see and use 7" large multi-function color monitor
- Can be displayed in 12 languages for global support.

See page 10.

PRODUCTIVITY & ECOLOGY FEATURES

Komatsu Technology

Komatsu develops and produces all major components, such as engines, electronics and hydraulic components, in house. With this "Komatsu Technology," and adding customer feedback, Komatsu is achieving great advancements in technology. To achieve both high levels of productivity and economical performance, Komatsu has developed the main components with a total control system.

The result is a new generation of high performance and environment friendly excavators.

Low Emission Engine

Komatsu SAA6D140E-5 engine is U.S. EPA Tier 3 and EU Stage 3A emissions certified, without sacrificing power or machine productivity.

Electronically Controlled Variable Speed Fan Contributes to Low Fuel Consumption and Low Noise

The electronic control system sets the revolution speed of the cooling fan according to the coolant, hydraulic oil, and ambient temperature; effectively uses the engine output to prevent wasteful fuel consumption; and reduces noise during low-speed fan revolution.

Lower and Economical Fuel Consumption Using Economy Mode

Enables operator to set the Economy mode to four levels according to working conditions so that production requirement is achieved at lowest fuel consumption.

Reduction of Ambient Noise

Reduced noise by adoption of an electronically controlled variable speed fan drive, large hybrid fan and low-noise muffler.

ECO Gauge that Assists Energy-saving Operations

ECO gauge is equipped for environment friendly energy-saving operations. Focus on operation in the green range allows reduction of CO₂ emission and fuel consumption.

ECO gauge

Idling Caution

To prevent unnecessary fuel consumption, an idling caution is displayed on the monitor, if the engine idles for 5 minutes or more.

Auto Deceleration and Auto Idling System

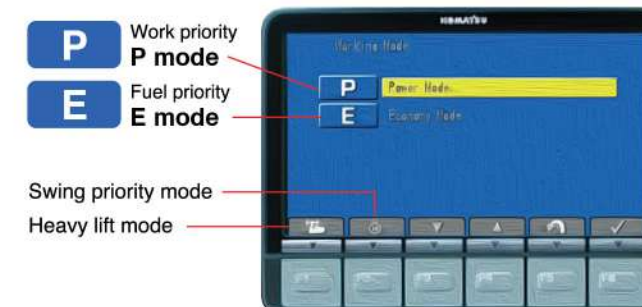

Auto deceleration system is equipped to reduce fuel consumption and operating noise. Also, engine idling speed can be set at a lower speed on monitor with auto idling system.

Working Modes Selectable

P and E modes established work modes are further improved.

P mode – Power or work priority mode has low fuel consumption, but fast equipment speed and maximum production and power are maintained.

E mode – Economy or fuel saving mode further reduces fuel consumption, but maintains the P-mode-like working equipment speed for light duty work.

Swing priority mode
Heavy lift mode

You can select Power or Economy modes using a one-touch operation on the monitor panel depending on workloads.

Heavy Lift Mode

Gives 10% more lifting force when needed for handling rock or heavy lifting applications.

Swing Priority Mode

The swing priority mode allows the operator to use the same easy motion for 180° loading as 90° loading operations. By altering the oil flow, this setting allows you to select either boom or swing as the priority for increased production.

Selection	Result
ON	Oil flow to the swing motor is increased. 180° loading operations are most efficient.
OFF	Oil flow to the boom is increased. 90° loading operations are most efficient.

Large Digging Force

With the one-touch Power Max. function digging force is further increased. (approx. 8.5 seconds of operation)

Maximum arm crowd force (ISO 6015):
250 kN (25.5 tonf) → **273 kN (27.9 tonf)** **9.4% UP**
(with Power Max.)

Maximum bucket digging force (ISO 6015):
333 kN (34.0 tonf) → **364 kN (37.2 tonf)** **9.4% UP**
(with Power Max.)

*Measured with Power Max function, 3600 mm 11'10" arm and ISO 6015 rating

Work Equipment Speed

An arm quick return circuit is provided for arm dumping. This returns a portion of oil flow directly to the hydraulic tank at arm dumping to reduce the hydraulic pressure loss. Speedier loading work can be accomplished by work equipment with quicker movement.

Large Drawbar Pull and Steering Force

Since the machine has a large drawbar pull and a high steering force, it demonstrates excellent mobility even when it is on inclined sites.

Two-mode Setting for Boom

Smooth mode provides easy operation for gathering blasted rock and scraping operations. When maximum digging force is needed, switch to **power mode** for more effective excavating.

Shockless Boom Control

The PC800-8E0 boom circuit features a shockless valve (double-check slow return valve) to automatically reduces the amount of vibration present when operating the boom. Operator fatigue is reduced (which can improve safety and productivity), and spillage caused by vibration is minimized.

RELIABILITY & DURABILITY FEATURES

Boom Foot Hoses

The boom foot hoses are arranged under the boom foot to reduce hose bend during operation, extending hose life and improving operator safety.

Metal Guard Rings

Metal guard rings protect all the hydraulic cylinders and improve reliability.

Sturdy Undercarriage

The undercarriage is strengthened to provide excellent reliability and durability when working on rocky ground or blasted rock.

Sturdy guards shield the travel motors and piping against damage from rocks.

O-ring Face Seal

The hydraulic hose seal method has been changed from a conventional taper seal to an O-ring seal. This provides improved sealing performance during operation.

Heat-resistant Wiring

Heat-resistant wiring is utilized for the engine electric circuit and other major component circuit.

Fuel Pre-filter (with Water Separator)

Removes water and contaminants from fuel to enhance the fuel system reliability.

Circuit Breaker

With circuit breaker, the machine can be easily restarted after repair.

High Efficiency Fuel Filter

Fuel system reliability is even better with high efficiency fuel filter.

High-pressure In-line Filtration

The PC800-8E0 has the most extensive filtration system available, providing in-line filters as standard equipment. An in-line filter in the outlet port of each main hydraulic pump reduces failures caused by contamination.

Photo is PC850-8E0. Photo may include optional equipment.

Strengthened Quarry Bucket Provides Outstanding Wear-resistance (optional for SE spec.)

The PC800-8E0 has the bucket for specific use in quarry, this is strong in impact and wear, and providing high performance and long life. Komatsu K VX's hard materials* provide excellent wear resistance. Combined with adoption of long-life KMAX teeth, durability of bucket is drastically enhanced.

* Komatsu K VX's hard materials: Komatsu K VX developed, wear-resistant, reinforced materials. Brinell hardness: 500 or more (180kgf/mm² class). Features high wear-resistance and little quality change from the heat generated during rock loading, maintaining long term hardness.

KMAX Tooth

- Unique bucket tooth shape, superior digging performance
- Long-term high sharpness
- Great penetration performance
- Hammerless, safe, and easy tooth replacement (Tooth replacement time: Halves the conventional machine.)

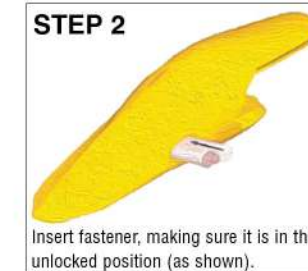

STEP 1

Observing proper safety procedures, place tooth onto adapter (as shown).

STEP 2

Insert fastener, making sure it is in the unlocked position (as shown).

STEP 3

Using the correct size socket, rotate the pin locking shaft 90° clockwise (as shown) to finish the installation.

STEP 4

To remove fastener, use the correct size socket to rotate the pin locking shaft 90° counter-clockwise (as shown). Remove fastener and tooth. Repeat steps 1-3 for a new installation.

Photo is PC850-8E0. Photo may include optional equipment.

WORKING ENVIRONMENT

Photo may include optional equipment.

Low Noise Design Cab

The newly-designed cab is highly rigid and has excellent sound absorption ability. Thorough improvement of noise source reduction and use of low noise engine, hydraulic equipment, and air conditioner allows the operator to work in quiet condition.

Operator ear's noise **2 dB(A) reduced**

Compared with the current model

Wide Newly-designed Cab

Newly-designed wide spacious cab includes seat with reclining backrest. The seat height and longitudinal inclination are easily adjusted using a pull-up lever. You can set the appropriate operational posture of armrest together with the console. Reclining the seat further enables you to place it into the fully flat state with the headrest attached.

Seat with headrest reclined full flat

Pressurized Cab

Optional air conditioner, air filter and a higher internal air pressure (+6.0 mm Aq +0.2"Aq) prevent external dust from entering the cab.

Multi-position Controls

The multi-position, Pressure Proportional Control (PPC) levers allow the operator to work in comfort while maintaining precise control. A double-slide mechanism allows the seat and control levers to move together or independently, allowing the operator to position the controls for maximum productivity and comfort.

Seat sliding amount: 340 mm 13.4"

Low Vibration with Cab Damper Mounting

PC800-8E0 uses viscous damper mounting for cab that incorporates longer stroke and the addition of a spring. The cab damper mounting combined with high rigidity deck aids vibration reduction at operator seat.

Cab Equipments

Skylight

Sliding Window and Large Side Mirror

Defroster (optional)

Cab Frame Mounted Wiper

Bottle Holder and Magazine Rack

Automatic Air Conditioner (optional)

Enables you to easily and precisely set cab atmosphere with the instruments on the large LCD. The bi-level control function keeps the operator's head and feet cool and warm respectively. This improved air flow function keeps the inside of the cab comfortable throughout the year. Defroster function keeps front glass clear.

Safety Features

Step Light with Timer

provides light for about one minute to allow the operator to get off the machine safely.

Pump/engine Room Partition

prevents oil from spraying on the engine if a hydraulic hose should burst.

Thermal and Fan Guards

are placed around high-temperature parts of the engine and fan drive.

Slip-resistant Plates

Spiked plates on working areas provide slip-resistant performance.

Horn Interconnected with Warning Light (optional)

gives visual and audible notice of the excavator's operation when activated.

Rear View Monitoring System (optional)

The operator can view the rear of the machine with a color monitor screen.

Large LCD Color Monitor

Large Multi-lingual LCD Monitor

A large user-friendly color monitor enables safe, accurate and smooth work. Improved screen visibility is achieved by the use of LCD that can easily be read at various angles and lighting conditions. Simple and easy to operate switches. Function keys facilitate multi-function operations. Displays data in 12 languages to support operators around the world.

- Indicators**
- 1 Auto-decelerator
 - 2 Working mode
 - 3 Travel speed
 - 4 Engine water temperature gauge
 - 5 Hydraulic oil temperature gauge
 - 6 Fuel gauge
 - 7 ECO gauge
 - 8 Function switches menu

- Basic operation switches**

Swing priority mode	

Equipment Management Monitoring System

Monitor Function

Controller monitors engine oil level, coolant temperature, battery charge and air clogging, etc. If controller finds any abnormality, it is displayed on the LCD.

Maintenance Function

Monitor informs replacement time of oil and filters on LCD when the replacement interval is reached.

Trouble Data Memory Function

Monitor stores abnormalities for effective troubleshooting.

MAINTENANCE FEATURES

Easy Checking and Maintenance of Engine

Engine check points are concentrated on one side of the engine to facilitate daily checks. Thermal guards are placed around high-temperature parts such as turbocharger.

One-touch Drain Cock

Easier, cleaner engine oil changes.

Easy Cleaning of Cooling Unit

Reverse-rotation function of the hydraulic driven fan facilitates cleaning of the cooling unit. In addition, this function contributes to reducing warming-up run time in low temperature and discharging hot air from the engine room to keep appropriate heat balance.

Long-life Oil, Filter

Uses high-performance filtering materials and long-life oil. Extends the oil and filter replacement interval.

Hydraulic oil filter (Eco-white element)

Engine oil & Engine oil filter	every 500 hours
Hydraulic oil	every 5000 hours
Hydraulic oil filter	every 1000 hours

Wide Catwalk

Easier, safer operator cab access and maintenance checks.

Steps Connected to the Machine Cab

Steps allows access from left hand catwalk to top of machine for engine check and maintenance.

Convenient Utility Space

Utility space provides great convenience to store tools, spare parts, etc.

Washable Cab Floor Mat

Cab floor mat is easy to keep clean. The gently inclined surface has a flanged floor mat and drainage holes to facilitate runoff.

Electric Pump, Grease Gun with Indicator (optional)

Greasing is made easy with the electric pump, grease gun with indicator.

Grease can drum storage location

Grease gun The grease gun can be reached from ground level. Indicator

Divided Type Engine Cover

The divided engine cover allows easily access to inspection points around the engine.

Photo may include optional equipment.

SPECIFICATIONS

ENGINE

Model Komatsu SAA6D140E-5
 Type 4-cycle, water-cooled, direct injection
 Aspiration Turbocharged, aftercooled, cooled EGR
 Number of cylinders 6
 Bore 140 mm 5.51"
 Stroke 165 mm 6.50"
 Piston displacement 15.24 ltr 930 in³
 Governor All-speed, electronic
 Horsepower:
 SAE J1995 Gross 370 kW 496 HP
 ISO 9249 / SAE J1349* Net 363 kW 487 HP
 Rated rpm 1800 rpm
 Fan drive type Hydraulic

*Net horsepower at the maximum speed of radiator cooling fan is 338 kW 454HP. U.S. EPA Tier 3 and EU Stage 3A emissions certified.

HYDRAULIC SYSTEM

Type Open-center load-sensing system
 Number of selectable working modes 2

Main pump:
 Type Variable-capacity piston pumps
 Pumps for Boom, arm, bucket, swing, and travel circuits
 Maximum flow 2 x 494 ltr/min 2 x 130.5 U.S. gal/min

Fan drive pump Variable capacity piston type

Hydraulic motors:
 Travel 2 x axial piston motor with parking brake
 Swing 2 x axial piston motor with swing holding brake

Relief valve setting:
 Implement circuits 31.4 MPa 320 kg/cm² 4,550 psi
 Travel circuit 34.3 MPa 350 kg/cm² 4,980 psi
 Swing circuit 28.4 MPa 290 kg/cm² 4,120 psi
 Heavy lift circuit* 34.3 MPa 350 kg/cm² 4,980 psi
 Pilot circuit 2.9 MPa 30 kg/cm² 430 psi

*Backhoe only

Hydraulic cylinders:
 (Number of cylinders—bore x stroke x rod diameter)
 Boom 2 – 200 mm x 1950 mm x 140 mm 7.9" x 76.8" x 5.5"
 Arm 1 – 200 mm x 2250 mm x 140 mm 7.9" x 88.6" x 5.5"

STANDARD EQUIPMENT

ENGINE AND RELATED ITEMS:

- Air cleaner, double element, dry
- Engine, Komatsu SAA6D140E-5
- Variable speed cooling fan, with fan guard

ELECTRICAL SYSTEM:

- Alternator, 60 amp, 24 V
- Auto decelerator and auto idling system
- Batteries, 170 Ah, 2 x 12 V
- Starting motors, 11kW
- Step light with timer
- Working lights-2 boom, 1 right front

UNDERCARRIAGE:

- 610 mm 24" double grouser
- Hydraulic track adjusters (each side)
- Sealed track
- 8 track/3 carrier rollers (each side)
- Variable track gauge

GUARDS AND COVERS:

- Dust-proof net for radiator and oil cooler
- Pump/engine room partition cover
- Travel motor guards

OPERATOR ENVIRONMENT:

- Cab with pull-up type front window
- Damper mount, all-weather, sound-suppressed cab with tinted safety glass windows, lockable door, intermittent window wiper and washer, floormat, cigarette lighter and ashtray
- Multi-function color monitor, electronically-controlled throttle dials, electric service meter, gauges (coolant temperature, hydraulic oil temperature and fuel level), caution lights (electric charge, engine oil pressure, and air cleaner clogging), indicator lights (engine preheating and swing lock light) level check lights (coolant, engine oil, and hydraulic oil level), self-diagnostic system with trouble data memory
- Rear view mirror (RH and LH)
- Seat, fully adjustable with suspension

HYDRAULIC CONTROLS:

- Control levers and pedals for steering and travel with PPC system
- Control levers, wrist control levers for arm, boom, bucket, and swing with PPC system
- Fully hydraulic, with Electronic Open-center Load Sensing System and engine speed sensing (pump and engine mutual control system)
- Heavy lift mode system
- In-line filter
- Oil cooler
- One axial piston motor per track for travel with counter balance valve
- Power max function
- Shockless boom control
- Swing priority mode system
- Two axial piston motors for swing with single-stage relief valve
- Two control valves, 5+4 spools (boom, arm, bucket, swing, and travel)
- Two-mode setting for boom
- Two variable capacity piston pumps

DRIVE AND BRAKE SYSTEM:

- Brakes, hydraulic lock travel brakes, oil disc parking
- Hydrostatic two travel speed system with planetary triple reduction final drive

OTHER STANDARD EQUIPMENT:

- Automatic swing holding brake
- Catwalk
- Counterweight, 9800 kg 21,610 lb
- Horn, electric
- Large handrails
- Marks and plates, English
- One-touch engine oil drainage
- Paint, Komatsu standard
- Preventive Maintenance (PM) tune-up service connector
- Rear reflector
- Slip-resistant plates
- Travel alarm

OPTIONAL EQUIPMENT

- Additional track guard
- Air suspension seat
- Alternator, 90 amp, 24 V
- Arms (Backhoe):
PC800-8E0:
— 3600 mm 11'10" arm assembly
— 4600 mm 15'1" arm assembly
— 5600 mm 18'4" arm assembly
PC800-8E0 SE spec.:
— 2945 mm 9'8" SE arm assembly
- Auto air conditioner
- Booms (Backhoe):
PC800-8E0:
— 8200 mm 26'11" boom assembly
PC800-8E0 SE spec.:
— 7100 mm 23'4" SE boom assembly
- Cab front guard level 2 (ISO 10262)

- Cab with fixed front window
- Coolant heater
- Counterweight 11850 kg 26,120 lb
- Double flange track roller
- 12V electric supply
- Fire extinguisher
- Full length track guard
- General tool kit
- Electric pump, grease gun with indicator
- High cab mount
- Interconnected horn and warning light
- Large-capacity batteries
- Loading shovel attachments
- Lower wiper
- OPG top guard level 2 (ISO 10262)
- Provision for fast fuel fill
- Radio AM/FM

- Rain visor
- Rear view monitoring system
- Seat belt 78 mm 3", 50 mm 2"
- Shoes:
— 710 mm 28" double grouser
— 810 mm 32" double grouser
— 910 mm 36" double grouser
— 1010 mm 40" double grouser
- Spare parts for first service
- Strengthened revolving frame underguard
- Sun visor
- Track frame undercover (center)
- Vandalism protection locks
- Working lights 2 (on cab)
